Download

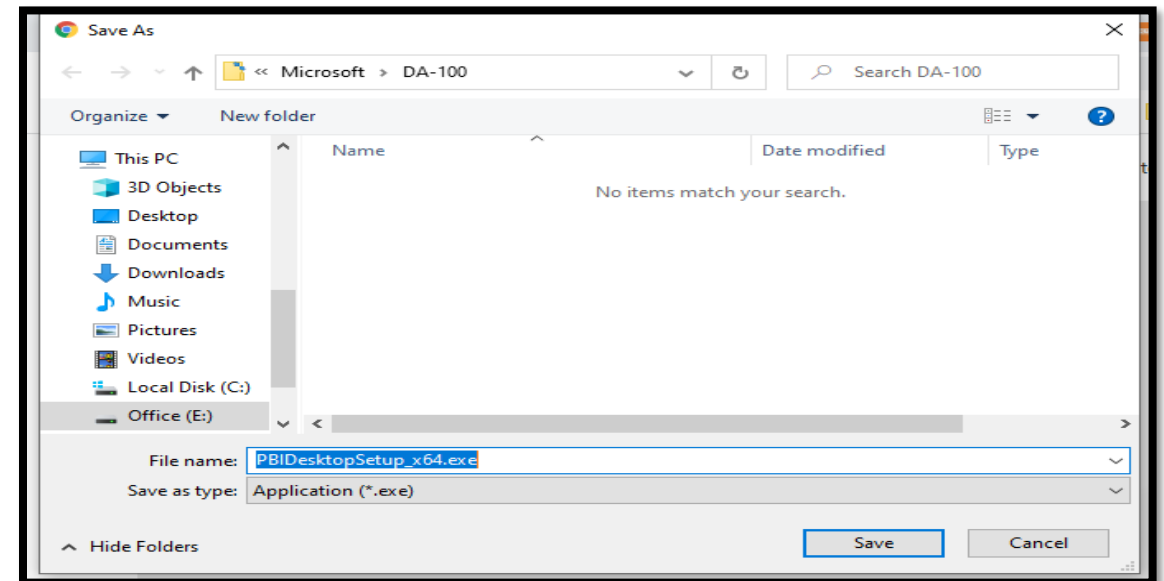

Microsoft Power BI Desktop is built for the analyst. It combines state-of-the-art interactive visualizations, with industry-leading data query and modeling built-in. Create and publish your reports to Power BI. Power BI Desktop helps you empower others with timely critical insights, anytime, anywhere.

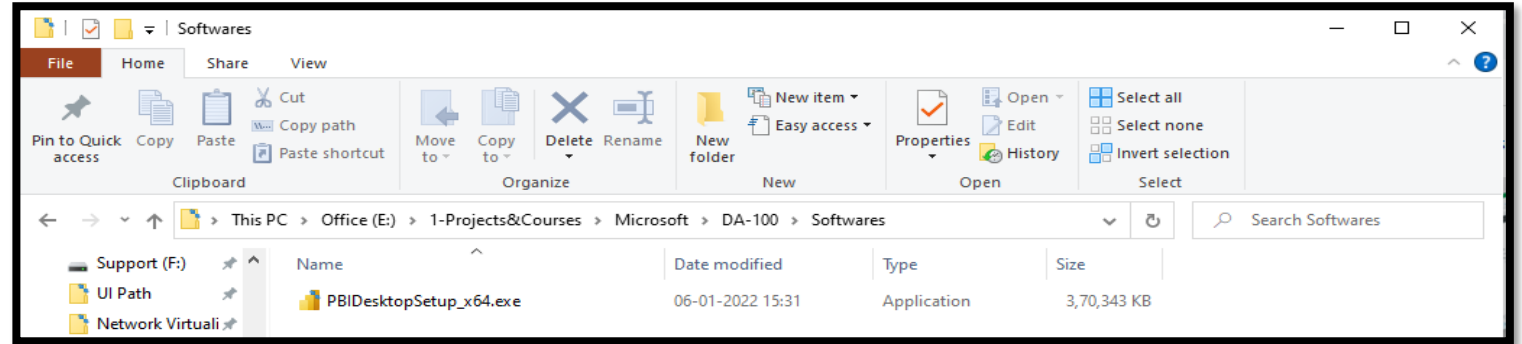

- Select the appropriate version from the list of downloads available.

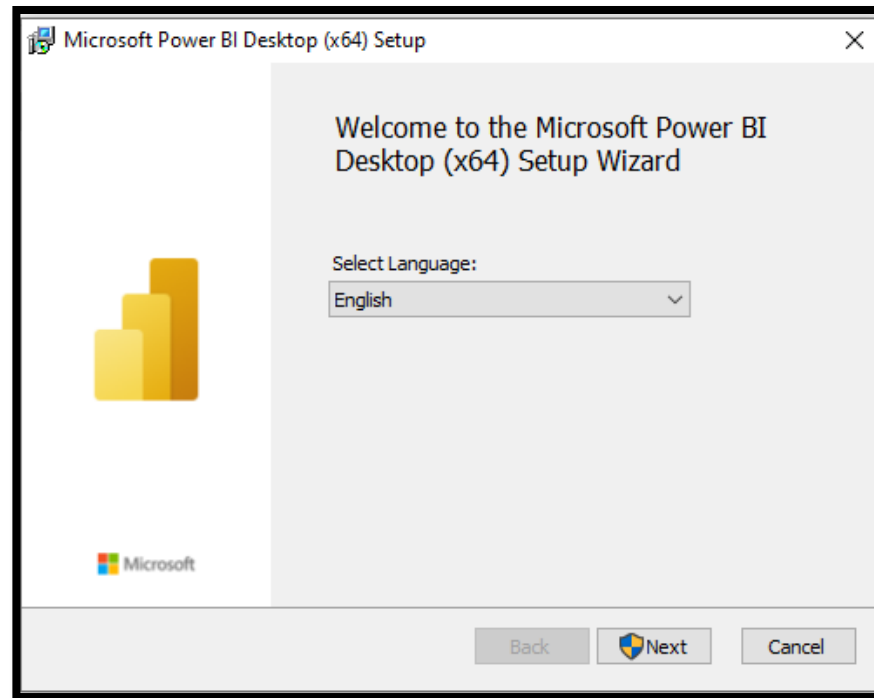

- Save the file into system local drive.

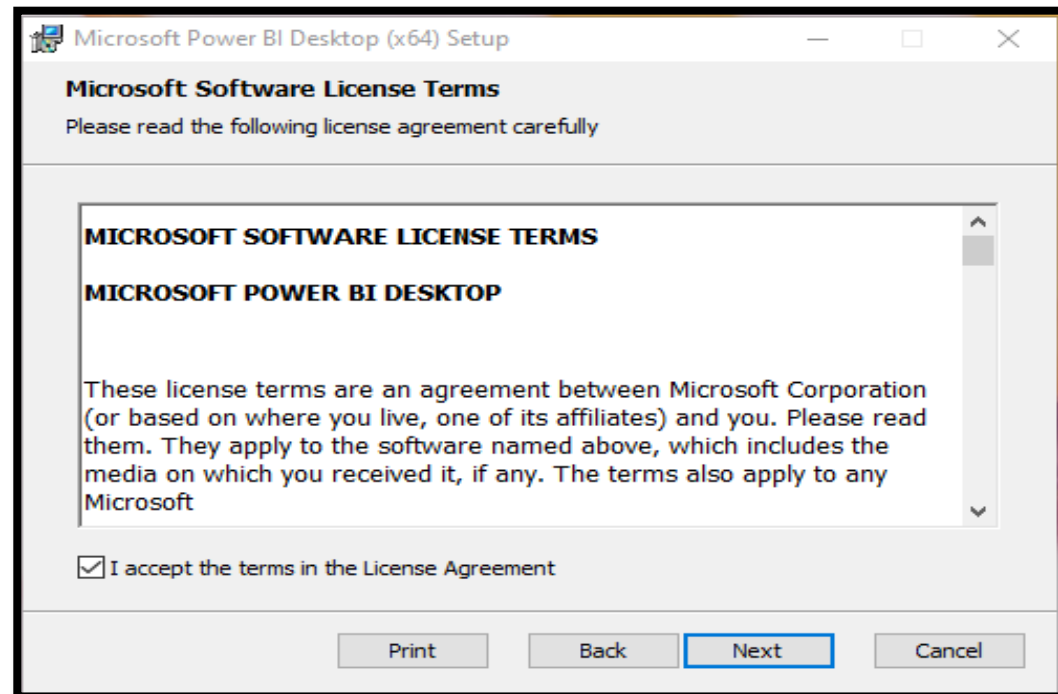

- Go to location, where the file was saved and double click to start “Installation” process. (usual process like other software, no need to change any option)

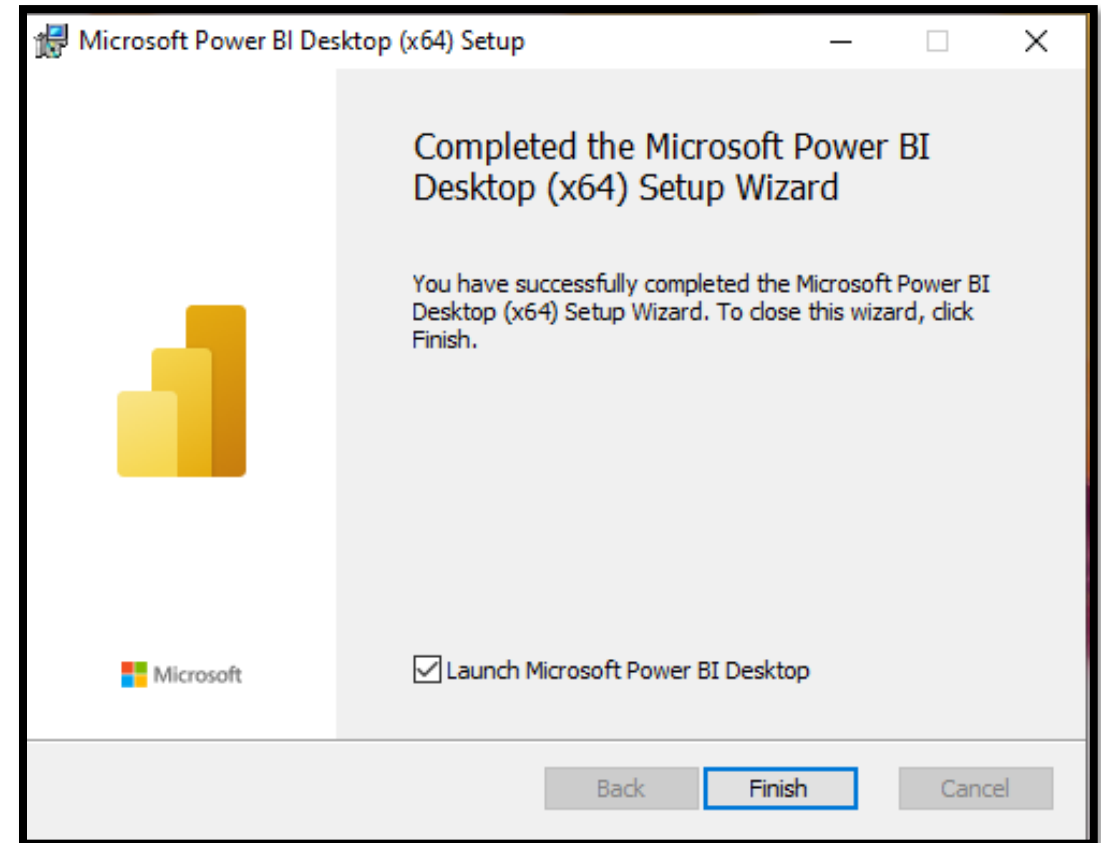

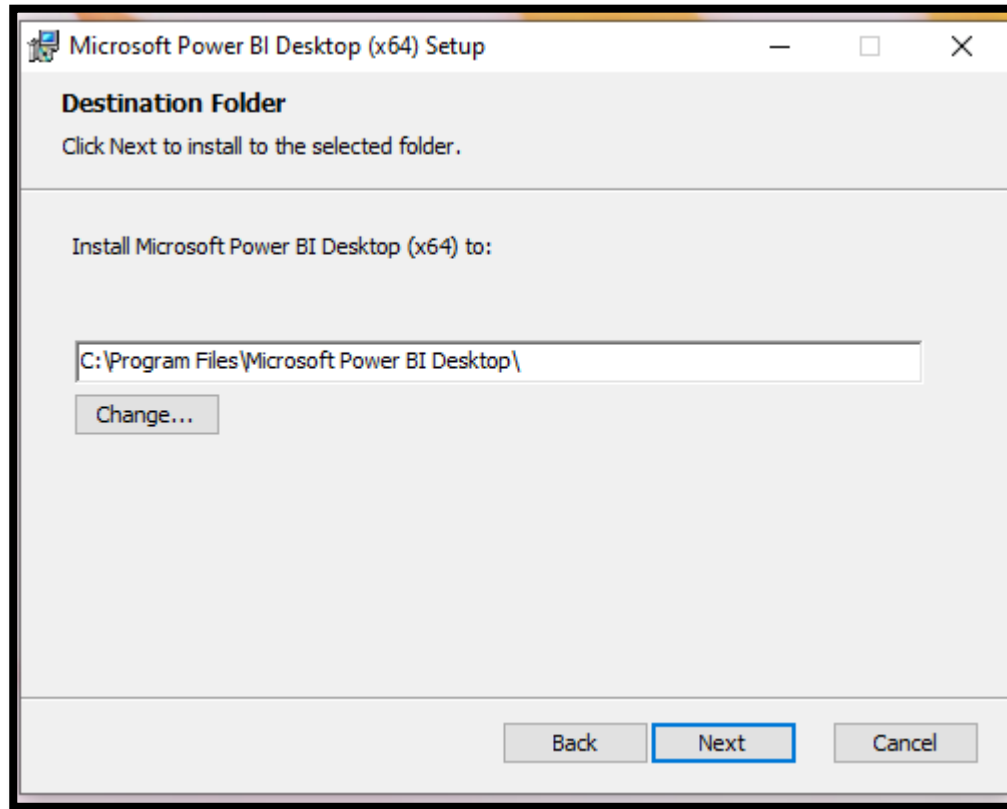

- Next → Yes →

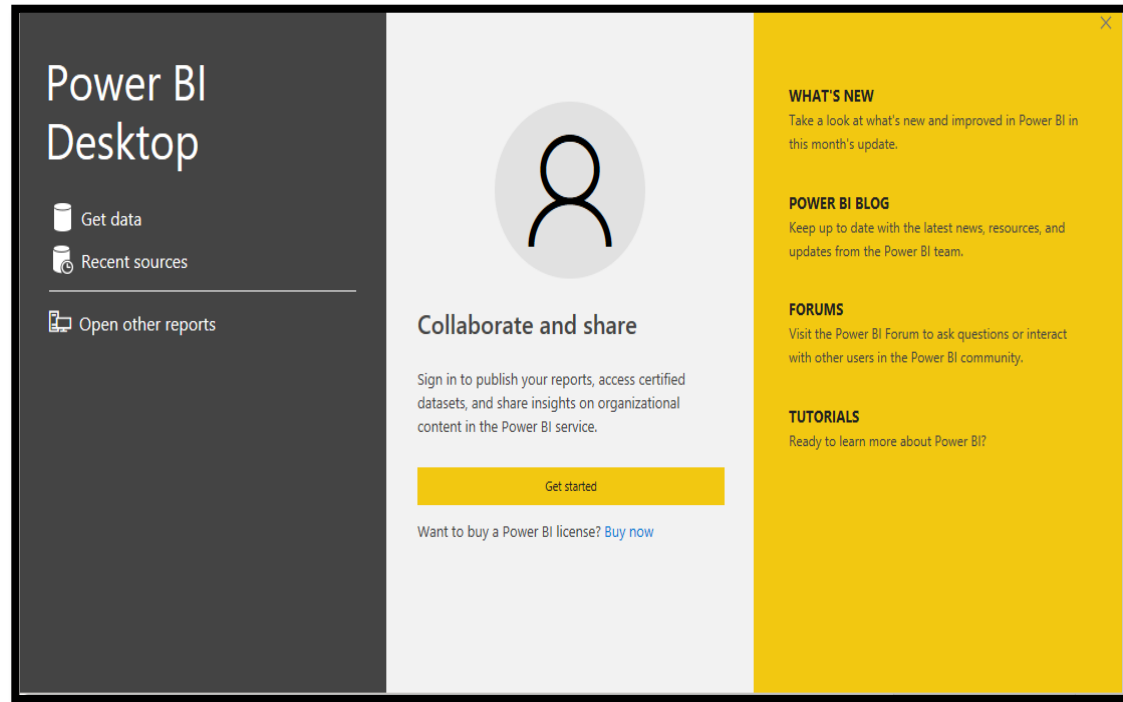

Next → Next →

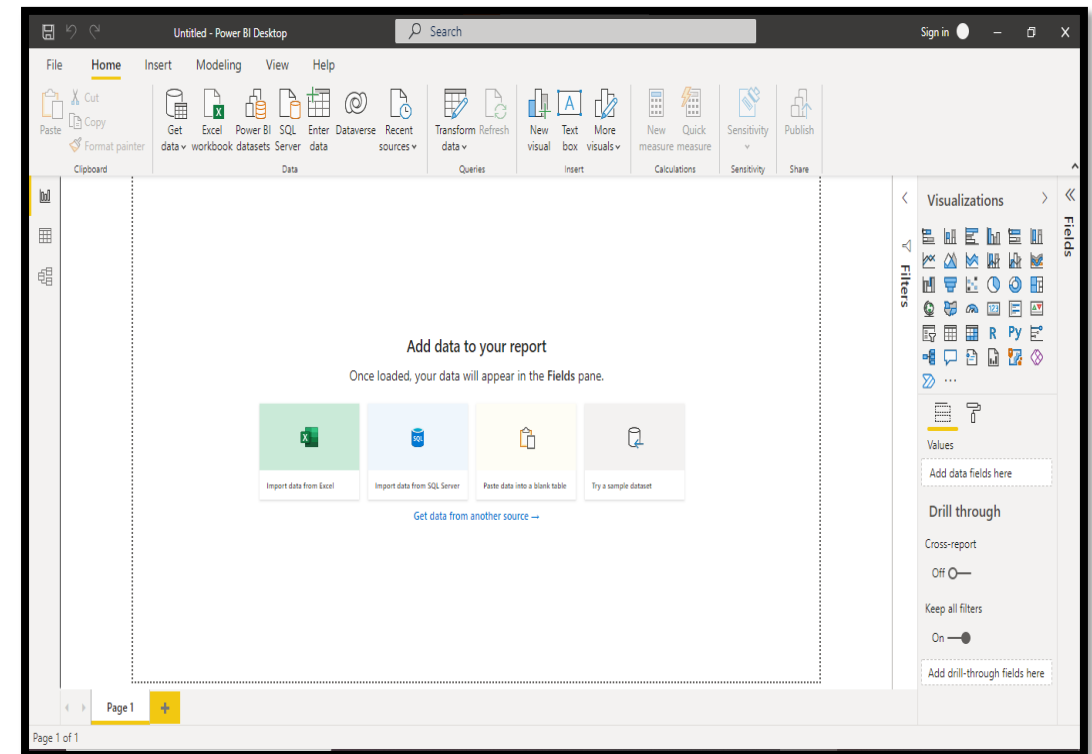

Next → Install

- Close dialog box using “X”.
- PowerBI Installation completed successful.

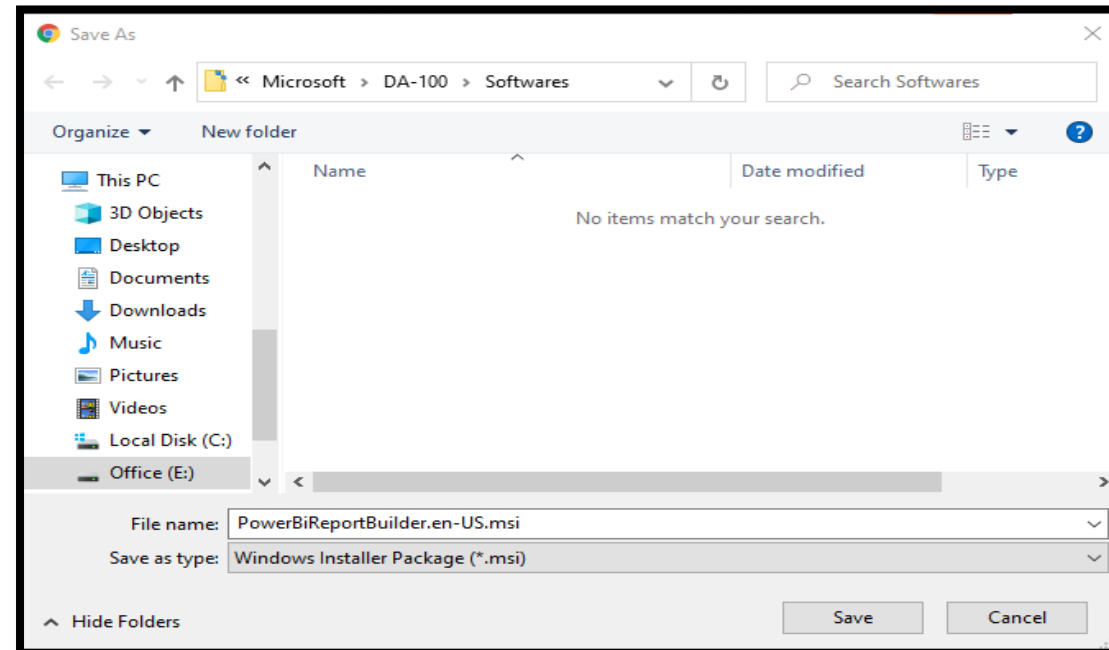

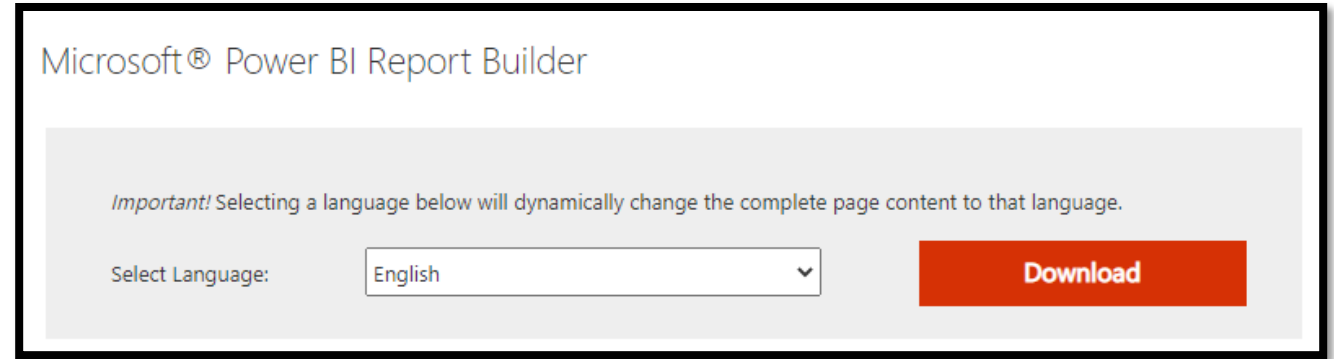

Step-2: Installation of Power BI Report Builder

Click the below link to download

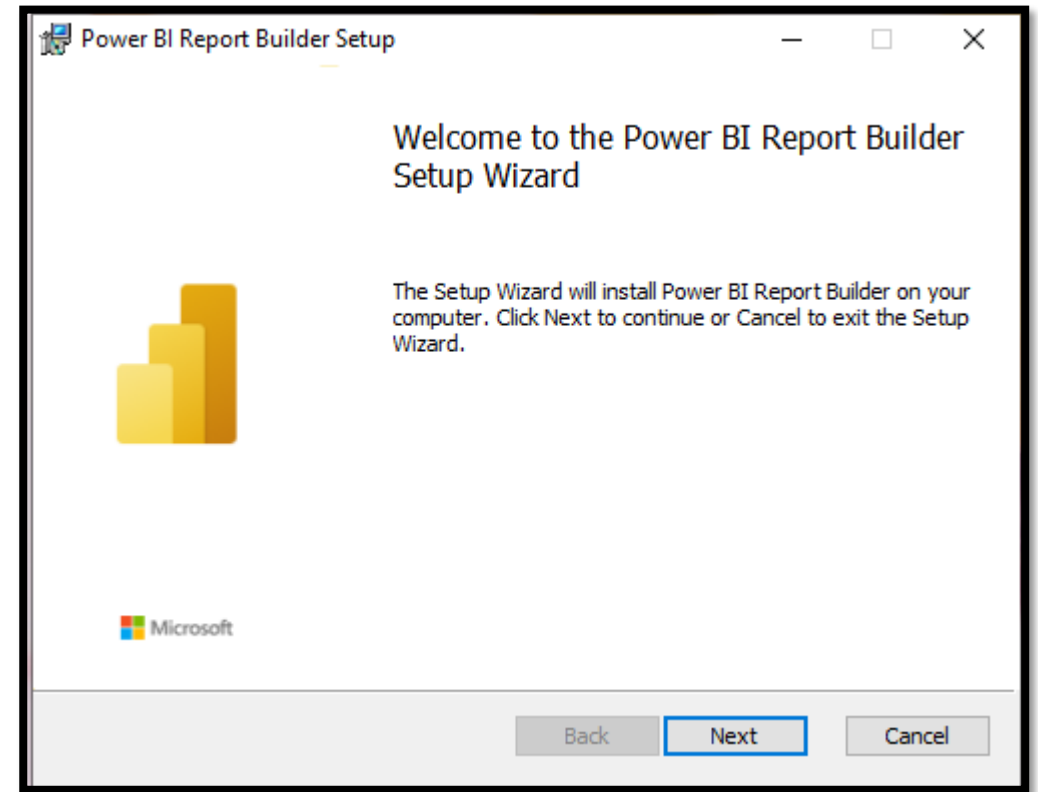

Microsoft Power BI Report Builder:

<https://www.microsoft.com/en-us/download/details.aspx?id=58158>

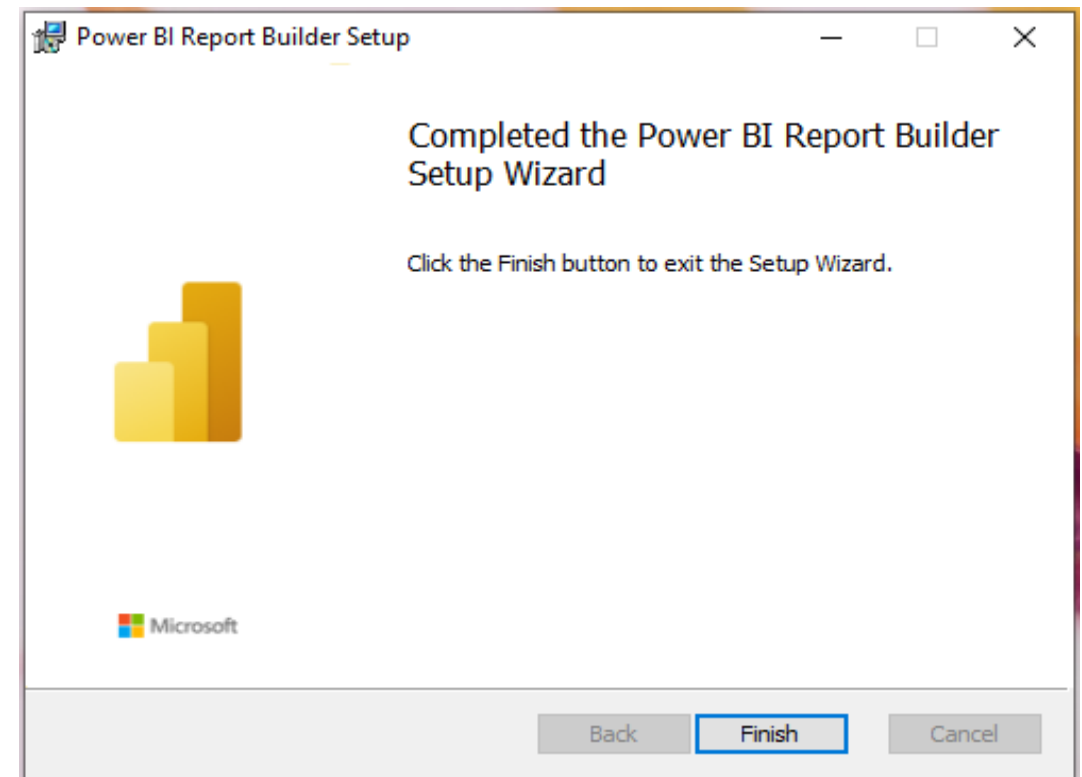

- Select the appropriate version from the list of downloads available.
- Save the file into system local drive.
- Go to location, where the file was saved and double click to start “Installation” process. (usual process like other software, no need to change any option)

| Name | Date modified | Type | Size |
|--|------------------|-----------------------|-------------|
|  PBIDesktopSetup_x64.exe | 06-01-2022 15:31 | Application | 3,70,343 KB |
|  PowerBiReportBuilder.en-US.msi | 06-01-2022 15:53 | Windows Installer ... | 29,440 KB |

Next → Next → Install → Yes → Finish.

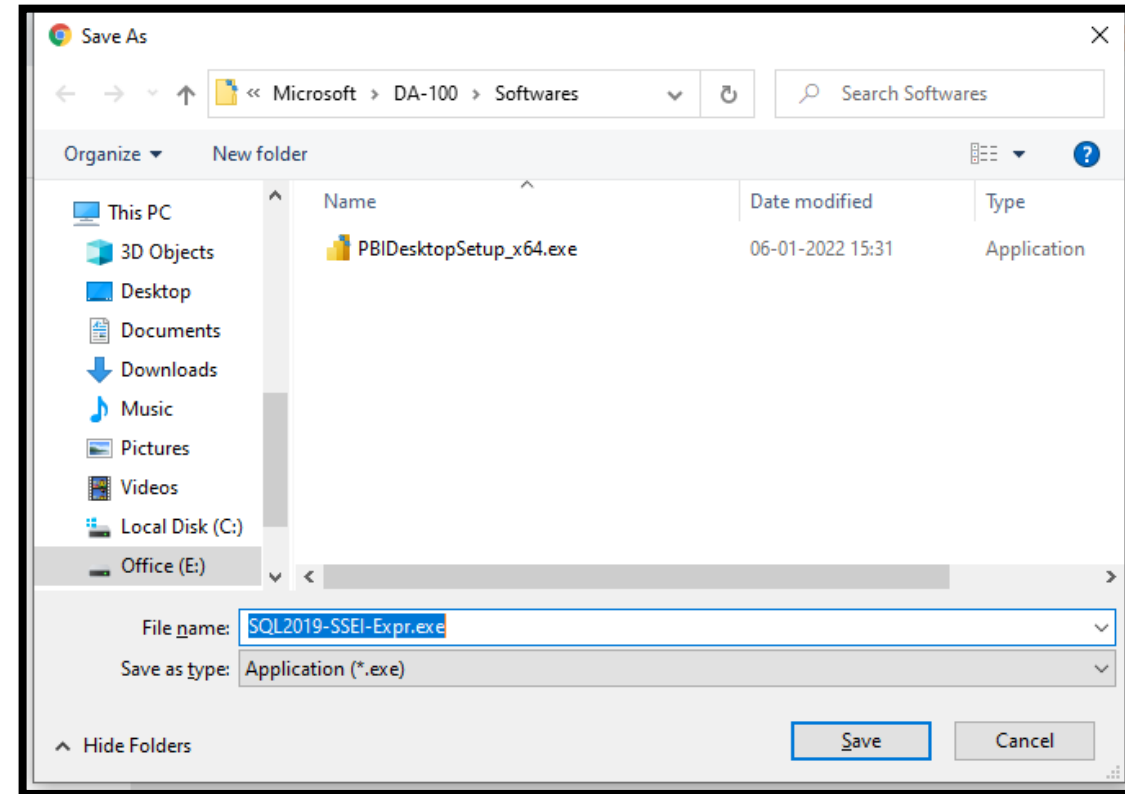

Step-3: Installation of SQL Express

- Click the below link to download SQL Express

<https://go.microsoft.com/fwlink/?linkid=866658>

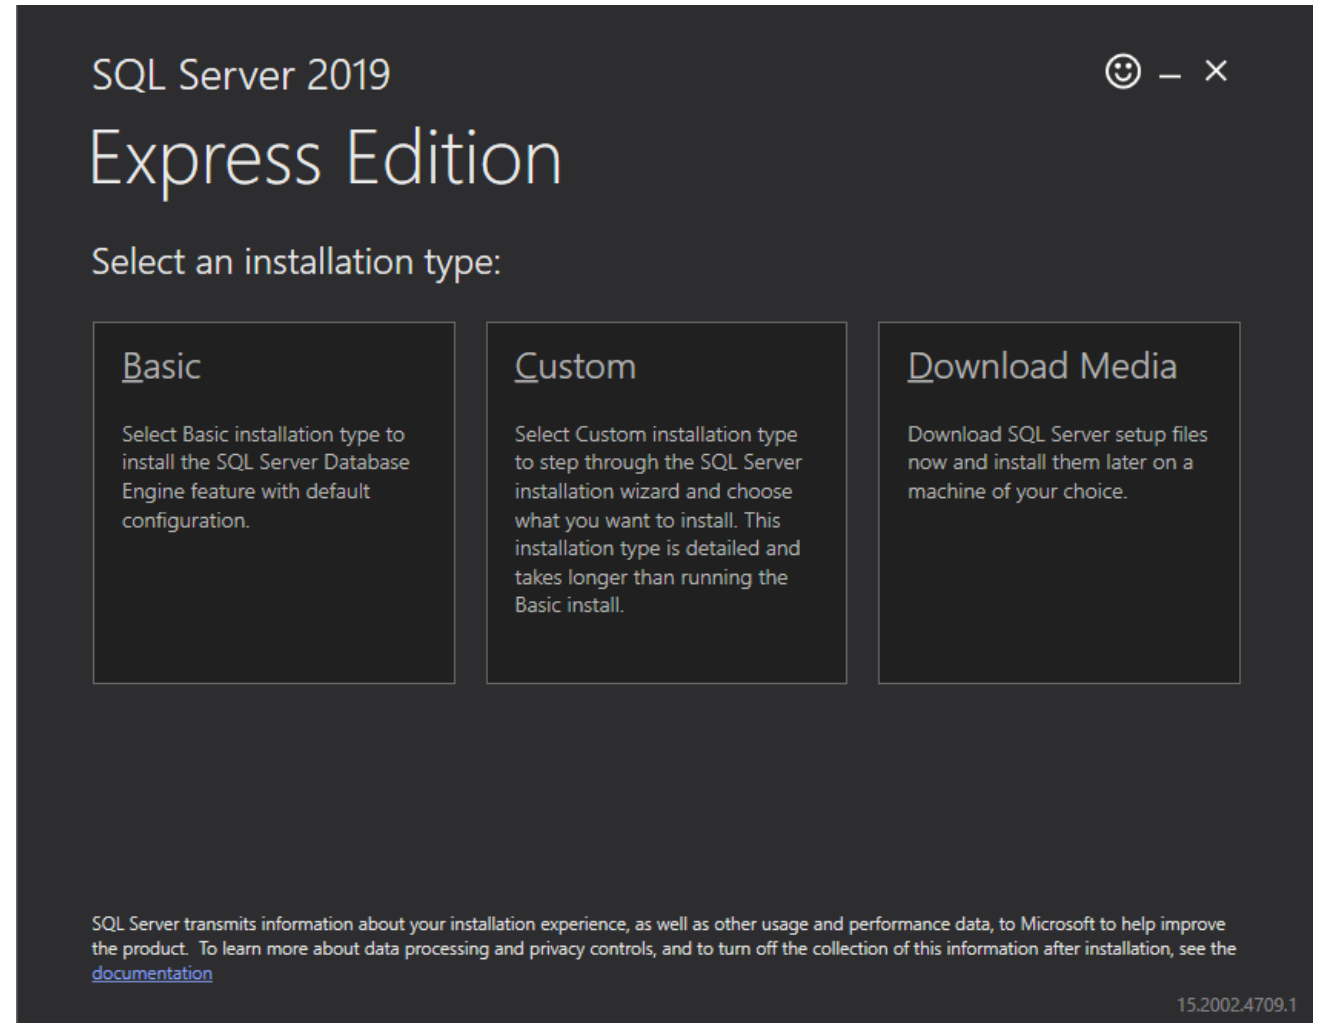

- Save the file into system local drive.

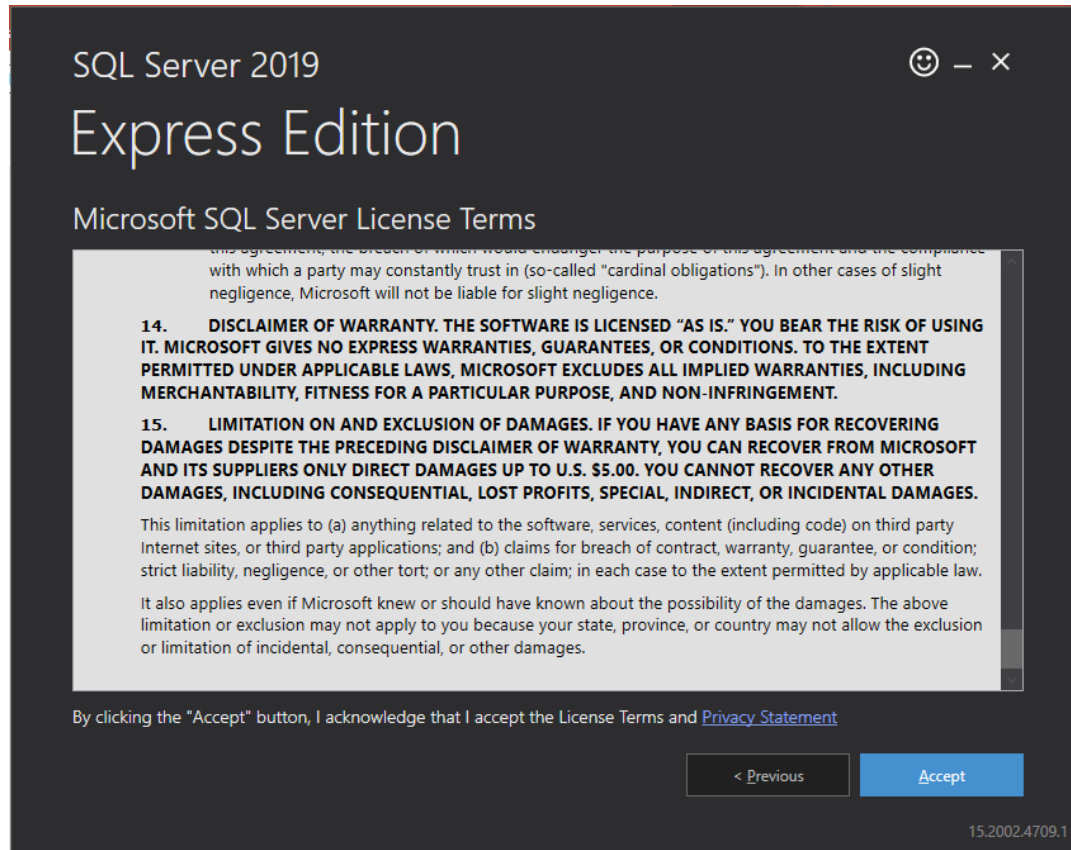

| Name | Date modified | Type | Size |
|--------------------------------|------------------|-----------------------|-------------|
| PBIDesktopSetup_x64.exe | 06-01-2022 15:31 | Application | 3,70,343 KB |
| PowerBiReportBuilder.en-US.msi | 06-01-2022 15:54 | Windows Installer ... | 29,440 KB |
| SQL2019-SSEI-Expr.exe | 06-01-2022 15:58 | Application | 6,227 KB |

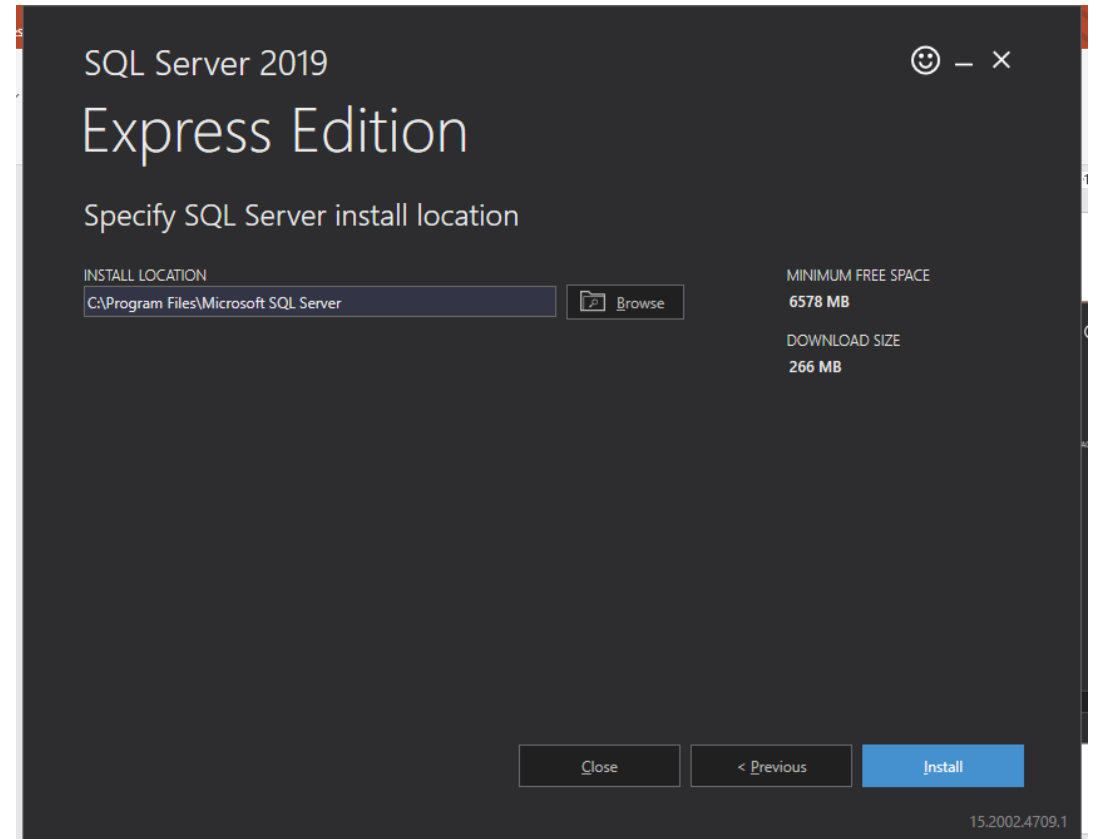

- Go to location, where the file was saved and double click to start “Installation” process.

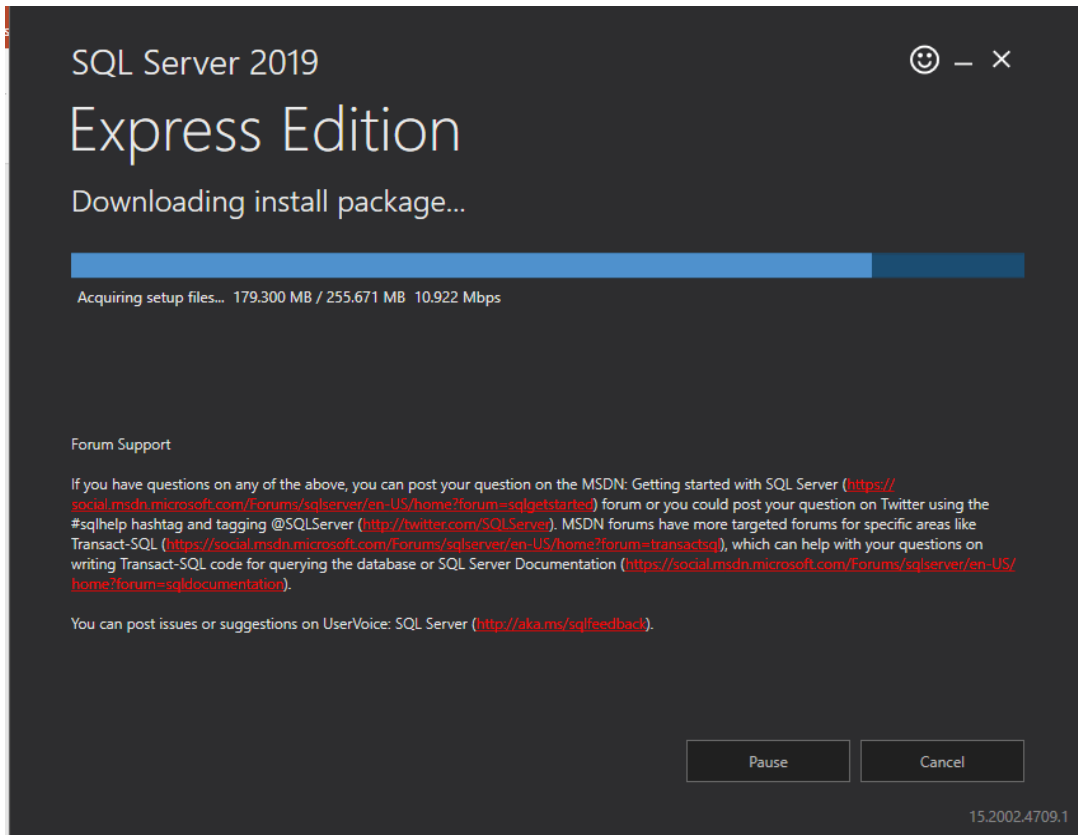

(usual process like other software, no need to change any option)
- Yes → Basic →

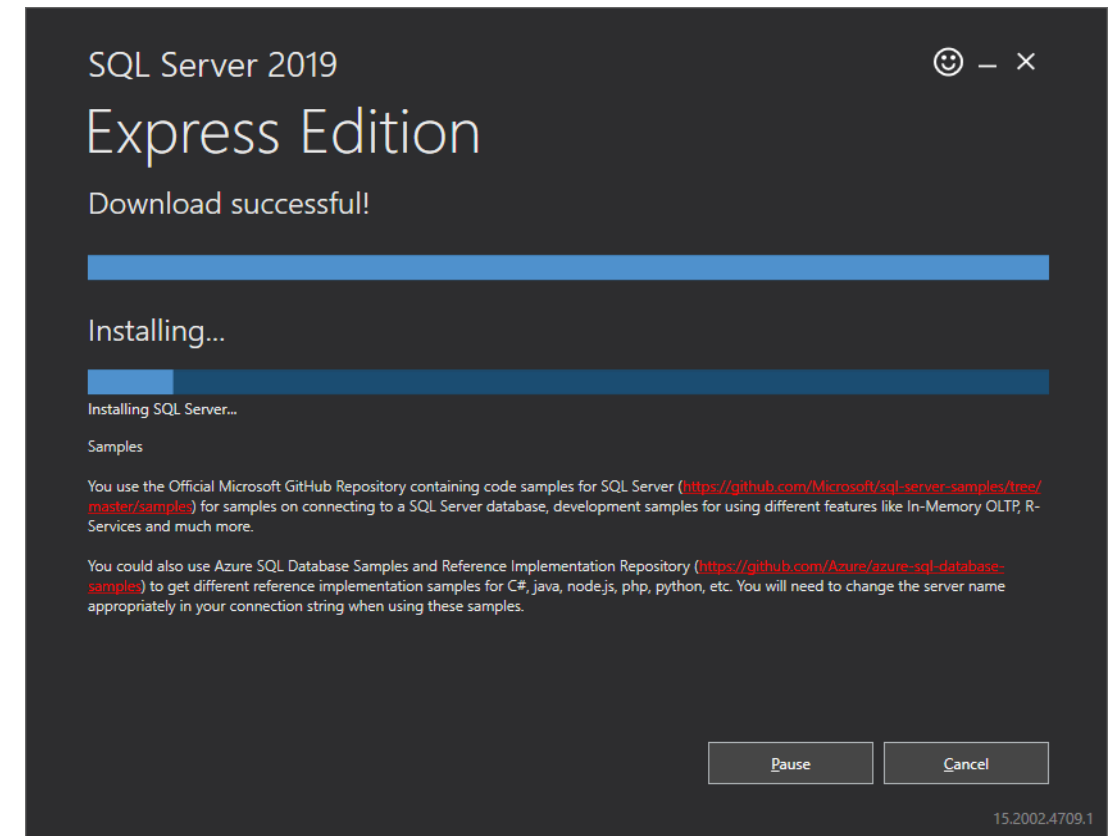

Accept → Install

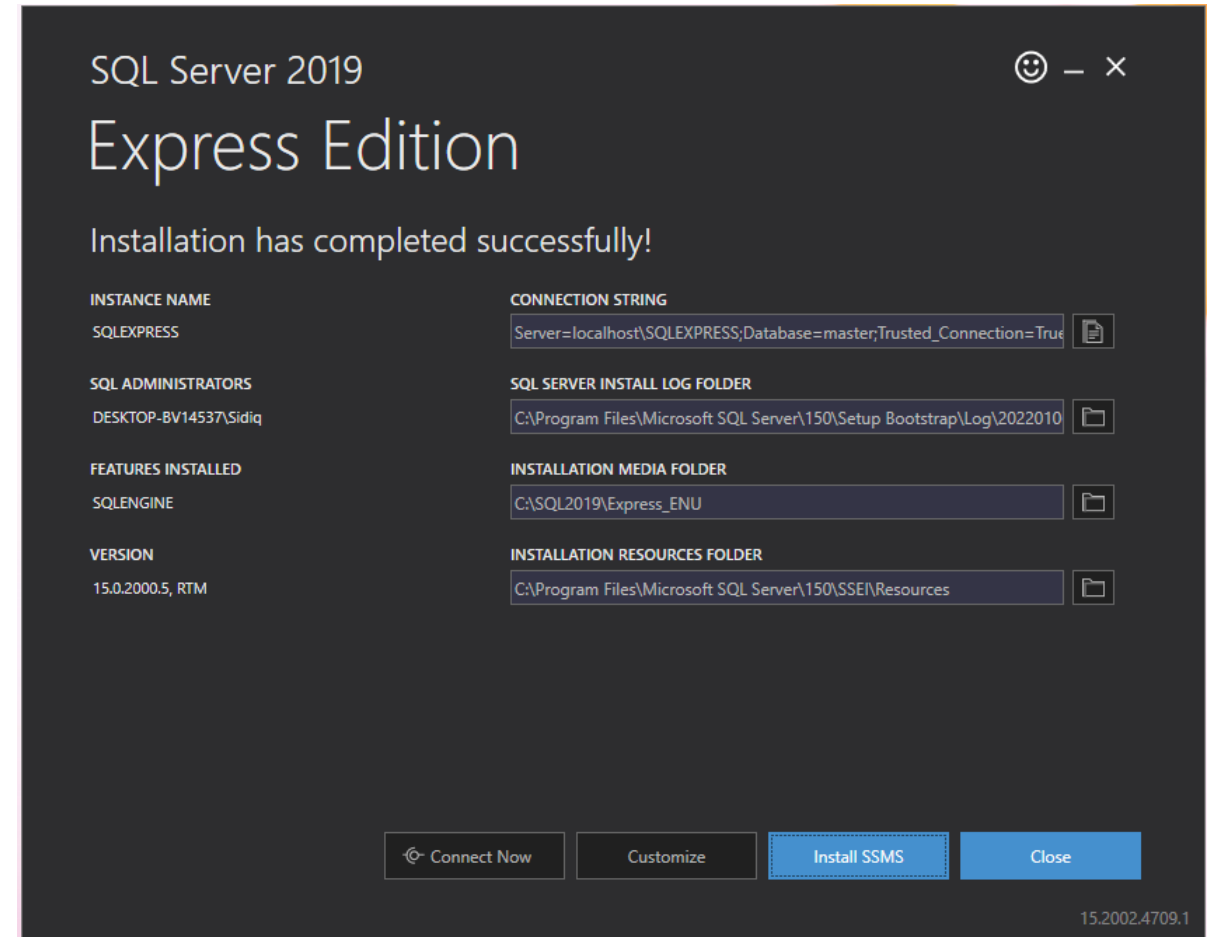

- Wait, it takes some time to complete the installation process.

- Close the window using “Close” button in the right bottom.

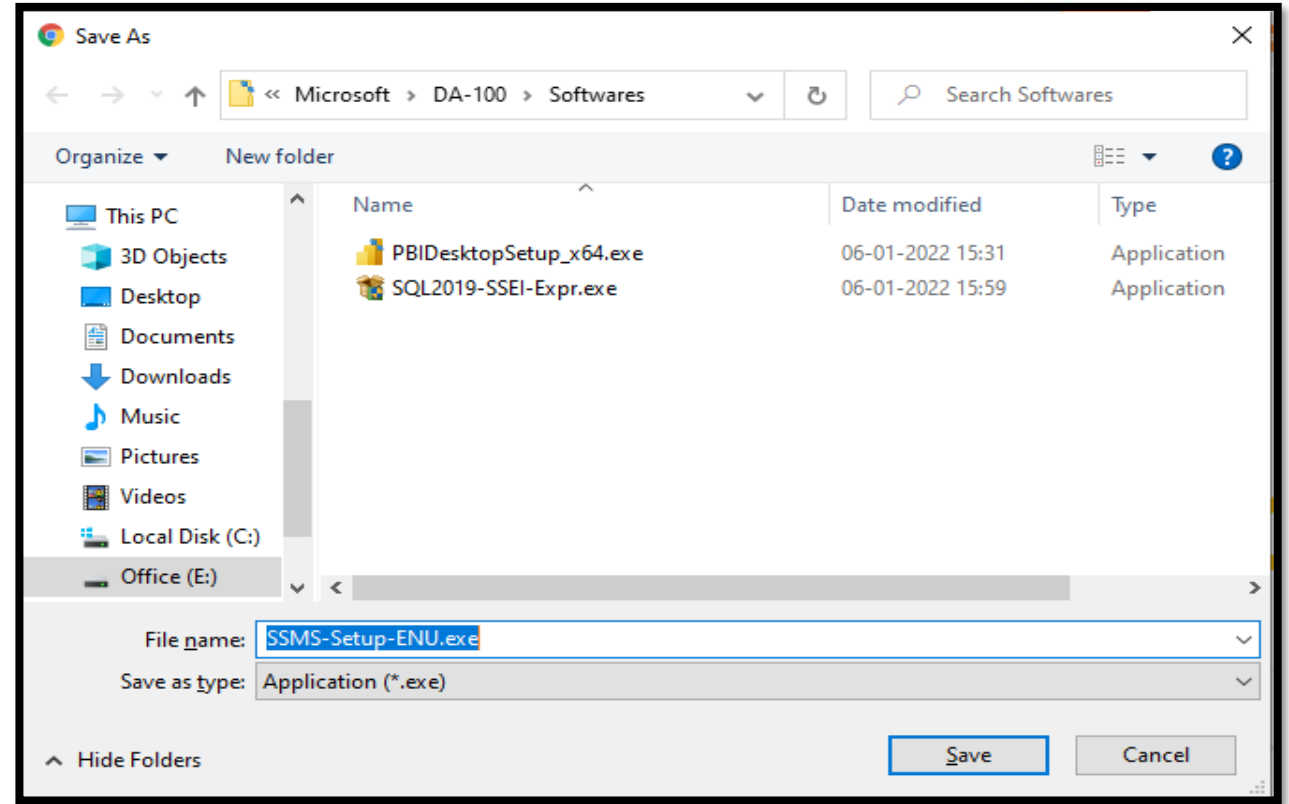

Step-4: Installation of SQL Server Management Studio

- Click the below link to download SQL Server Management Studio

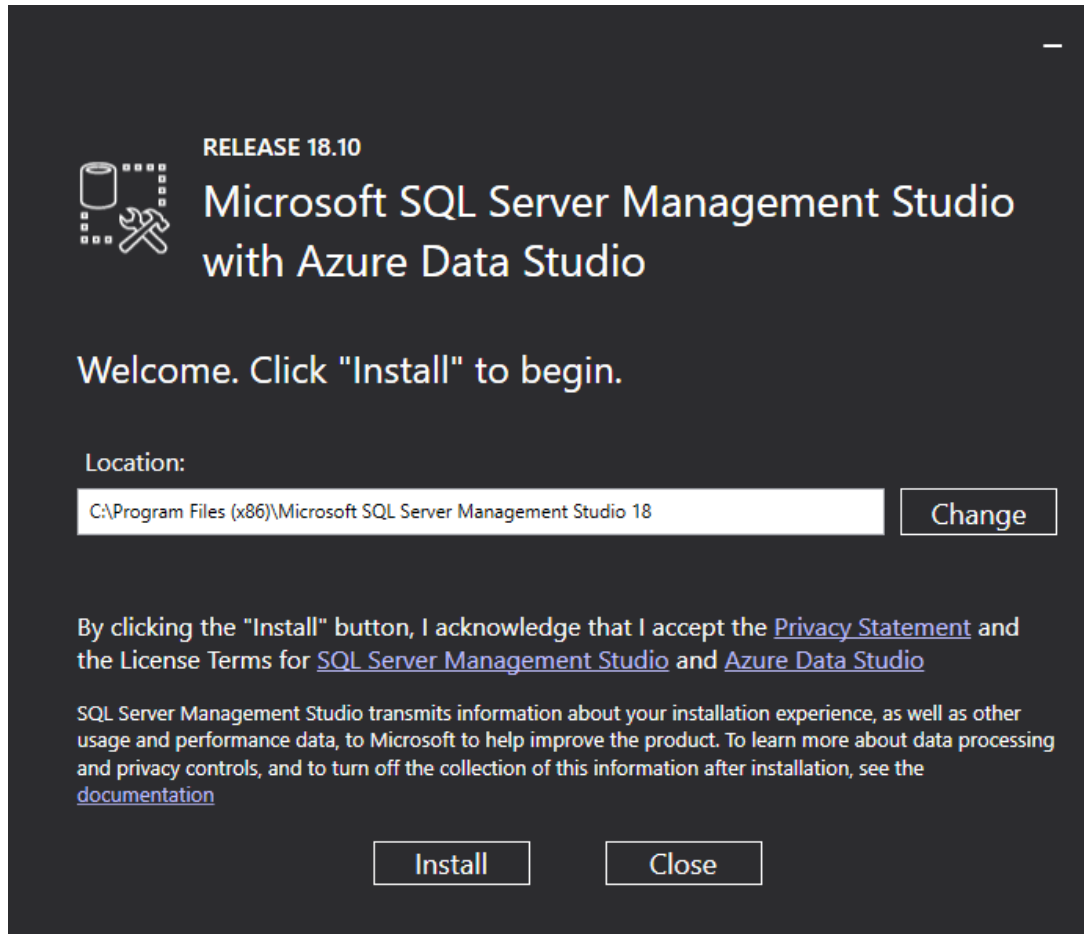

<https://aka.ms/ssmsfullsetup>

- Save the file into system local drive.

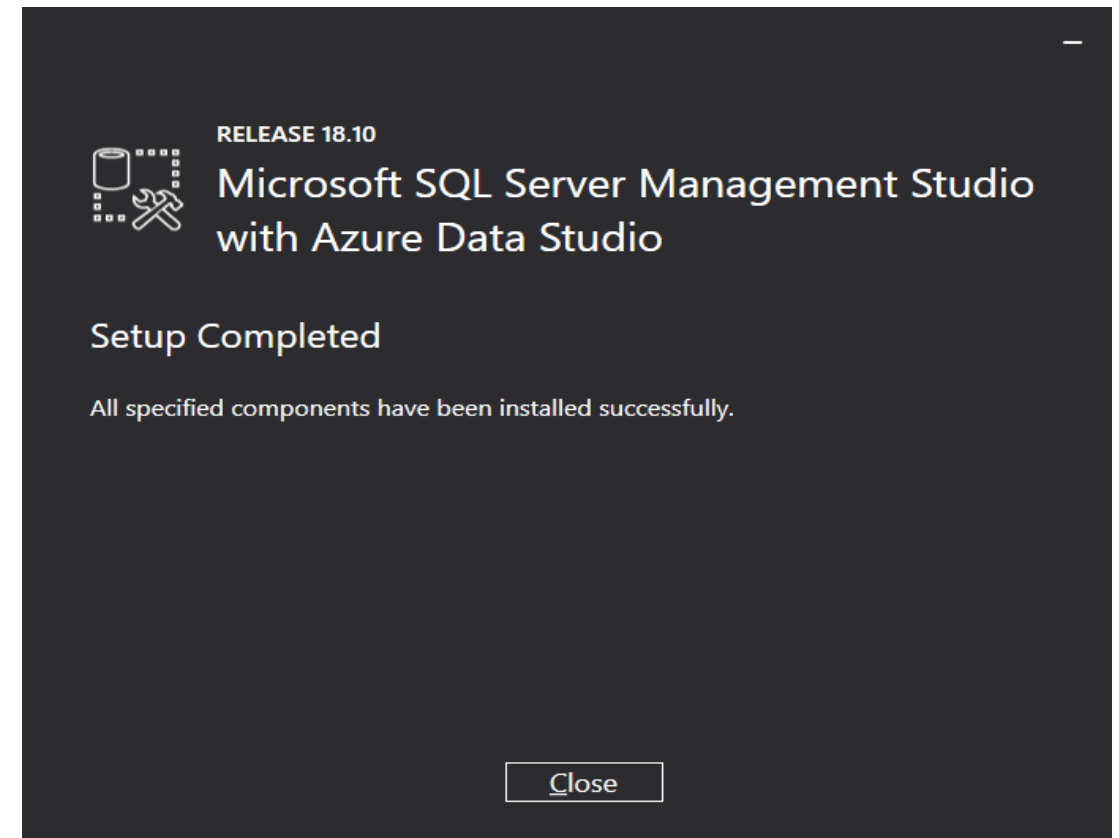

| Name | Date modified | Type | Size |
|--------------------------------|------------------|-----------------------|-------------|
| PBIDesktopSetup_x64.exe | 06-01-2022 15:31 | Application | 3,70,343 KB |
| PowerBiReportBuilder.en-US.msi | 06-01-2022 15:54 | Windows Installer ... | 29,440 KB |
| SQL2019-SSEI-Expr.exe | 06-01-2022 15:59 | Application | 6,227 KB |
| SSMS-Setup-ENU.exe | 06-01-2022 16:27 | Application | 6,69,116 KB |

- Go to location, where the file was saved and double click to start “Installation” process. (usual process like other software, no need to change any option)

Install → Close.

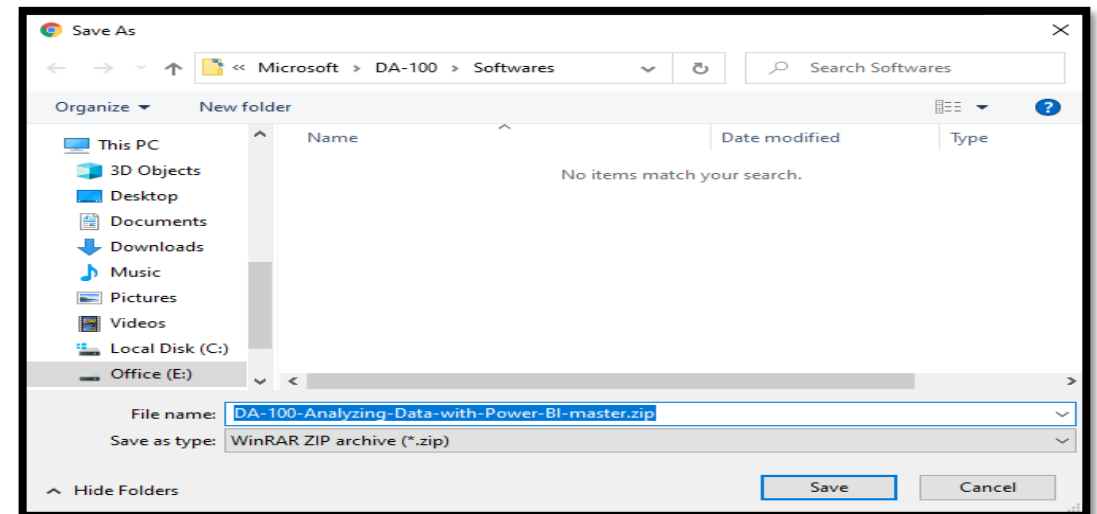

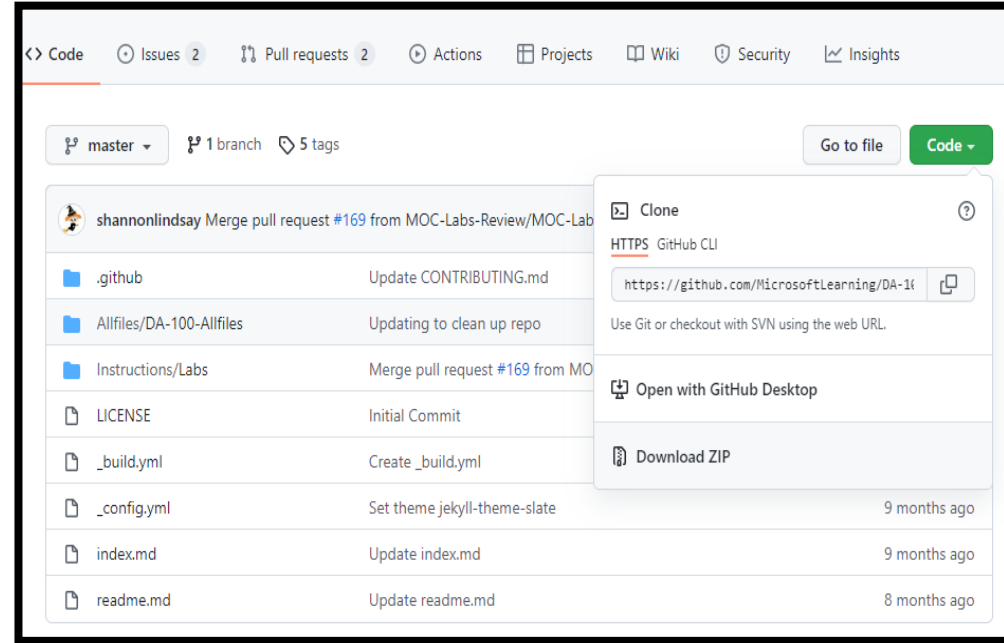

Step-5: Download the supporting files and database

- Click the below link to download supporting files

<https://github.com/MicrosoftLearning/DA-100-Analyzing-Data-with-Power-BI>

- Code → Download ZIP

- Go to location, where the file was saved and unzip folder.
- “AdventureWorksDW2020.bak” is the database file using for our lab. It’s available in folder → (DA-100-Analyzing-Data-with-Power-BI-master\Allfiles\DA-100-Allfiles\DatabaseBackup).

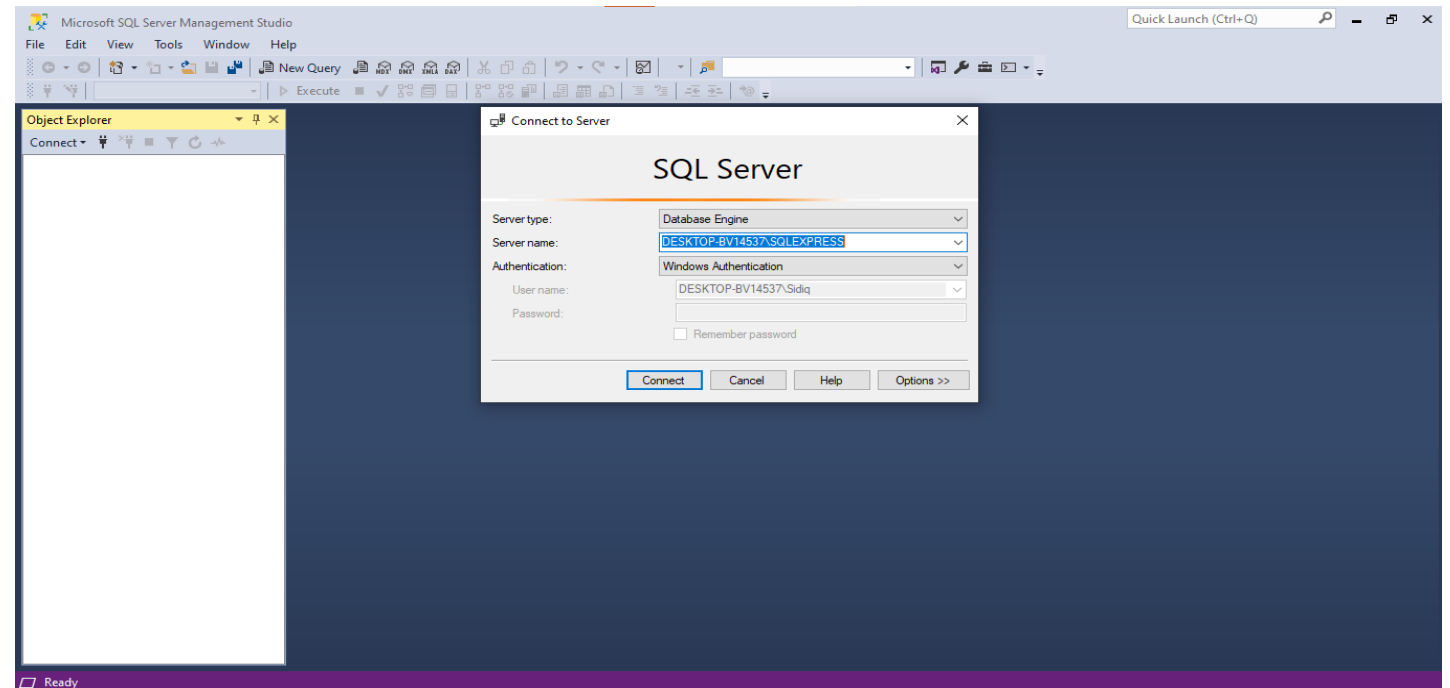

| Name | Date modified | Type | Size |
|--|------------------|-----------------------|-------------|
| PBIDesktopSetup_x64.exe | 06-01-2022 15:31 | Application | 3,70,343 KB |
| PowerBiReportBuilder.en-US.msi | 06-01-2022 15:54 | Windows Installer ... | 29,440 KB |
| SQL2019-SSEI-Expr.exe | 06-01-2022 15:59 | Application | 6,227 KB |
| SSMS-Setup-ENU.exe | 06-01-2022 16:27 | Application | 6,69,116 KB |
| DA-100-Analyzing-Data-with-Power-BI-master.zip | 06-01-2022 16:43 | WinRAR ZIP archive | 46,465 KB |

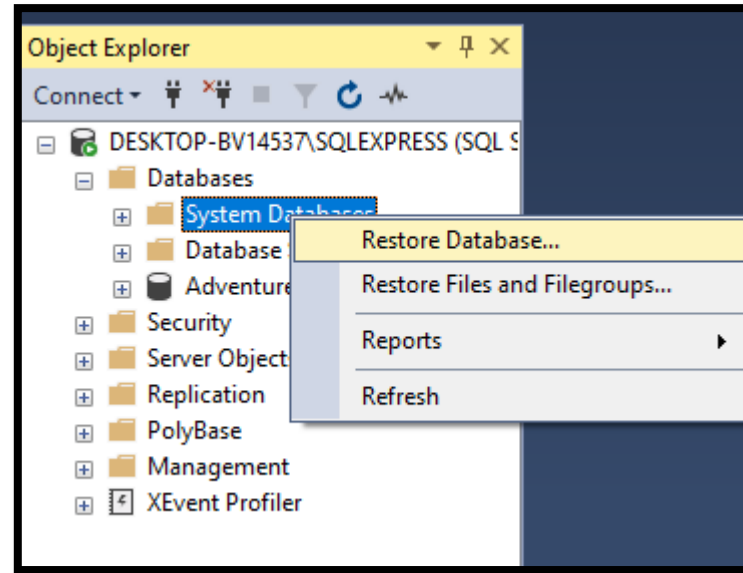

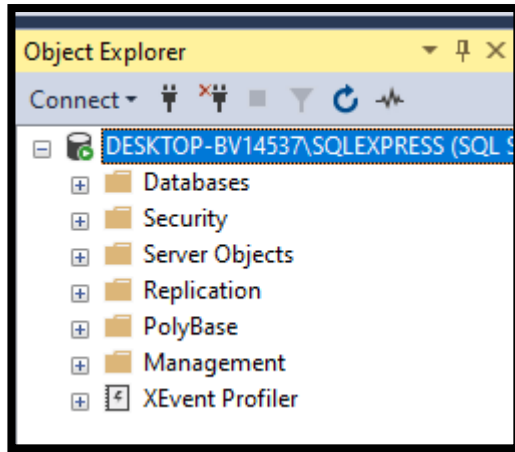

| Name | Date modified | Type | Size |
|--------------|------------------|-------------|------|
| .github | 28-12-2021 13:29 | File folder | |
| Allfiles | 28-12-2021 13:29 | File folder | |
| Instructions | 28-12-2021 13:29 | File folder | |
| _build.yml | 28-12-2021 13:29 | YML File | 2 KB |
| _config.yml | 28-12-2021 13:29 | YML File | 1 KB |
| index.md | 28-12-2021 13:29 | MD File | 1 KB |
| LICENSE | 28-12-2021 13:29 | File | 2 KB |
| readme.md | 28-12-2021 13:29 | MD File | 4 KB |

| Name | Date modified | Type | Size |
|--------------------------|------------------|----------|-----------|
| AdventureWorksDW2020.bak | 28-12-2021 13:29 | BAK File | 19,140 KB |
| TailspinToys2020-US.bak | 28-12-2021 13:29 | BAK File | 29,789 KB |

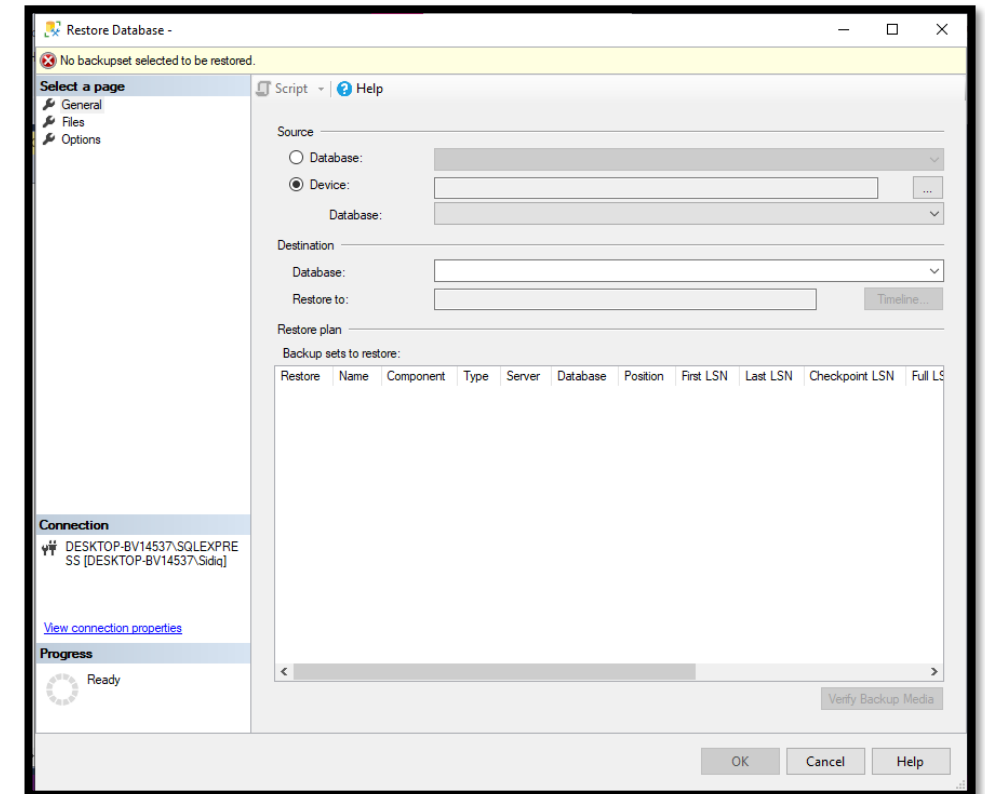

Step-6: Restore the database

- Open the “SQL Server Management Studio” from application list
- Don’t change anything on the opening window, just check the Server name should be “PC Name\SQLEXPRESS”. (Note: Remember this path of database, have to use the same with Power BI)
- Click on “Connect” button to proceed.

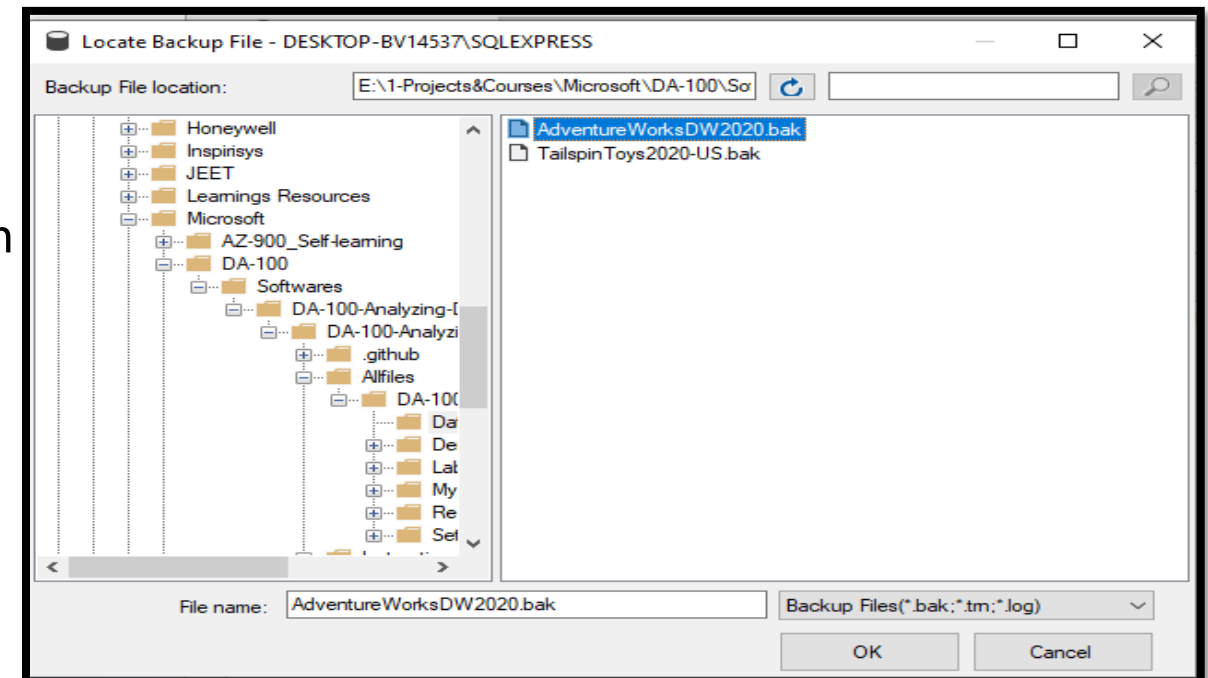

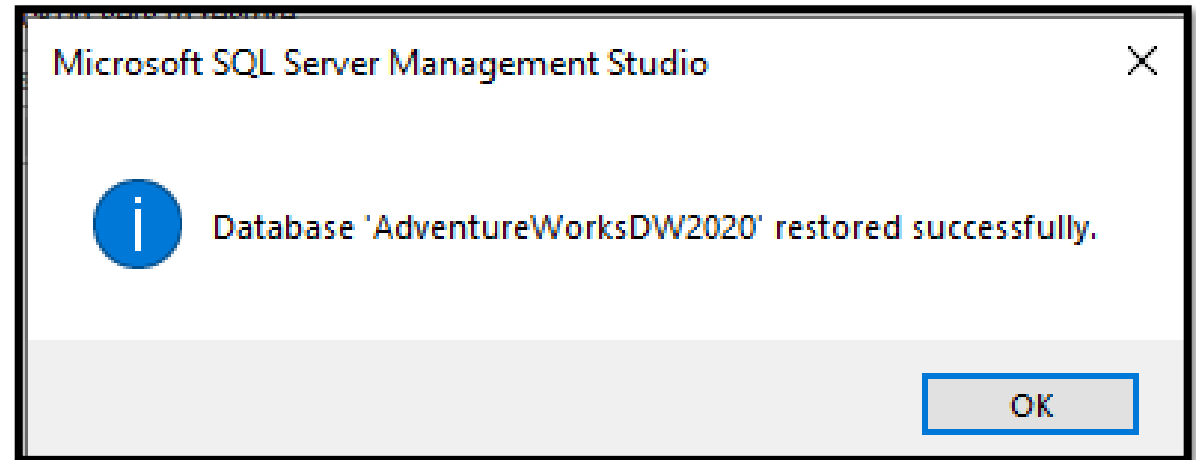

- From the left panel of “SQL Server Management Studio”
→ go to Databases → System Databases → Right click →
Click on “Restore Database...”
- In new dialog box select the “Device” button and click on
... next to the text field.

- In new pop-up window → Add
- Again new pop-up window appear, locate the database folder from the saved location using the list available in the left panel of a dialog box
- After locating the folder, from right side select the file (“AdventureWorksDW2020.bak”) in the right panel
- Ok → Ok → Ok → Added successfully.

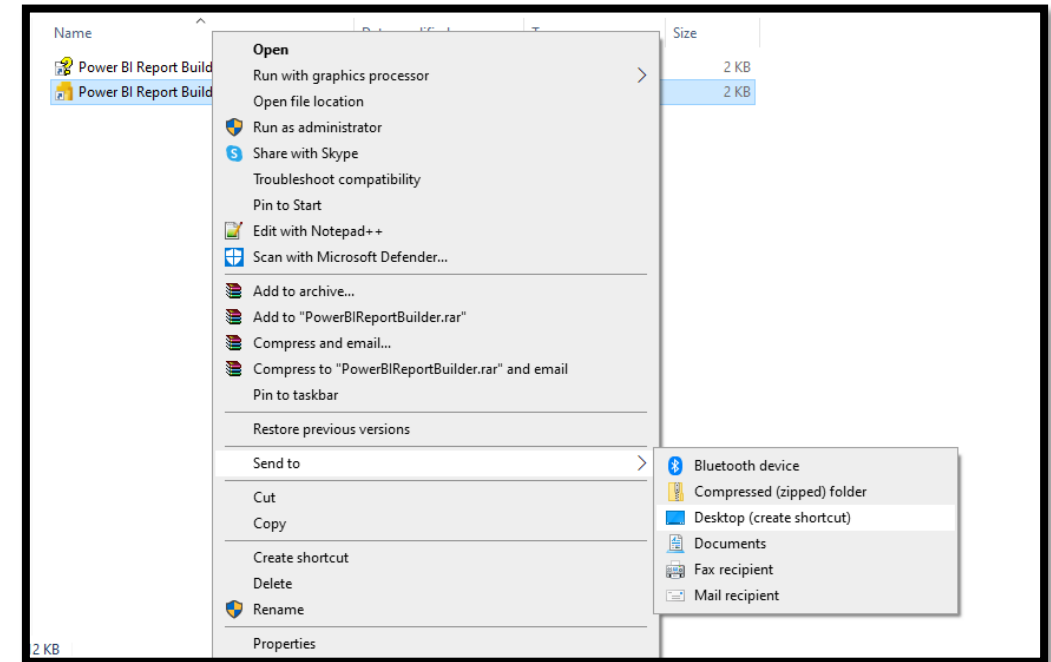

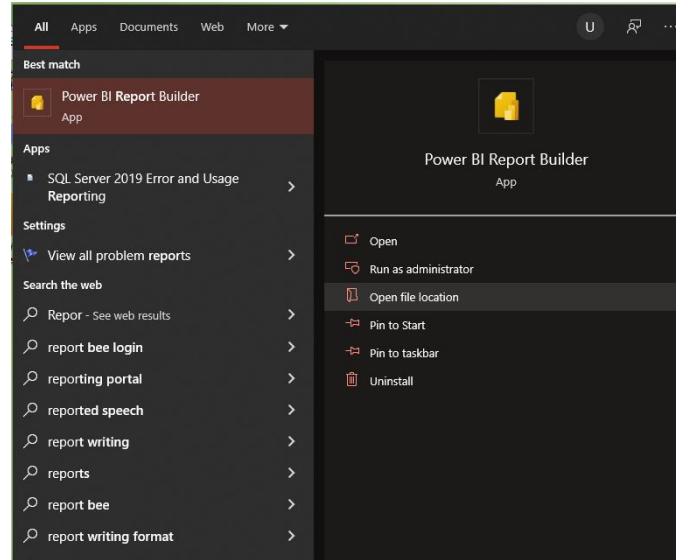

- Database “AdventureWorksDW2020”
restored successfully.
- Click → Ok.

Step-7: Creating shortcut for Power BI Report Builder

- Search “Power BI Report Builder” using search option on Task bar
- Select → Open file location → Right click → Send to → Desktop (create shortcut).

Congratulations!

- Successfully completed the installation and restoration of database.
- Now, follow the lab manual to completed exercises.
- **“PC Name\SQLEXPRESS”** (Note: Remember this path of database, have to use with Power BI).
